#TDWWOODCONNECTION

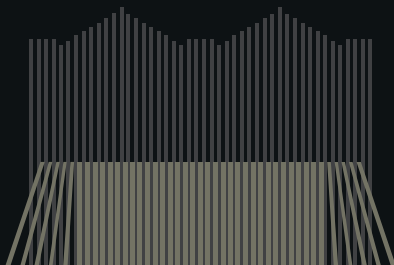

A collective and sustainable space to bring foresight of our new future and an avant-garde design concept using the oldest natural material: Wood.

An arena to connect with the city values and design, showcasing creative and innovative ideas inspired by wood and the chance to translate today's challenges into opportunities for tomorrow.

From material innovation to circularity with a focus on new ways to involve and capture the interest of the new generation as a collective project.

M 13

STUDIO

The delicacy of our natural surroundings, intertwined with the avant-garde will be the success of our future. Born out of the necessity to look into the future anarchical, M13 began inevitably as a result of the collective approach and collaboration for Salone 2023.

A collective studio.

A fluid and dynamic approach.

A focus on design.

Strong and fresh values for tomorrow.
